

Traceable spices and cocoa, plot to container

1,250 agroforestry smallholders · 2,000-tonne facility at Natar · every lot verified in TAPAK

Prepared for
ATDAG Cairo · September 2026

WHO WE ARE

KGF is an Indonesian spice and cocoa company based in Lampung, the country's principal pepper-producing province. We are not a broker. We buy directly from 1,250 smallholder farmers we organised and trained across three regencies — Pesawaran, Tanggamus and Lampung Barat — grade and consolidate at our own 2,000-tonne warehouse in Natar, and ship under contract.

The company was founded in 2022 to restore land degraded by former gold mining and return villagers to professional farming. That is the origin of the name.

TWO BUSINESSES THAT FUND EACH OTHER

Tech-enabled trading. Buying direct removes the layers of collectors that normally sit between an Indonesian smallholder and an exporter. That is what makes both the traceability claim and the farmer price premium real.

Regenerative agribusiness. Our supply base is agroforestry, not monoculture. Crops grow in a multi-strata system alongside shade and timber trees, on land being restored rather than cleared — producing the verified deforestation-free supply that premium buyers increasingly require.

AT A GLANCE

2022	Established, Pesawaran, Lampung
1,250	Smallholder farmers under contract
~600 ha	Under management (1,250 × 0.5 ha assumed)
2,000 t	Warehouse and processing, Gudang Natar
17	Verified field buying stations, Tanggamus
15	Internal staff, incl. 5 field facilitators

WHERE WE SHIP TODAY

Verstegen Spices and Sauces of the Netherlands contracts 80–100 t of black pepper for 2026 and audited our Natar warehouse in August. Europe is our only export market to date — Egypt is the second we are here to open.

CAPACITY — THE CONSTRAINT IS WORKING CAPITAL, NOT PLANT

Our facility at Natar is deliberately not running at its limit. Machine hours are available and our farmer network can supply more than we currently buy, because until now we concentrated on a single European contract. New buyer volume displaces nothing.

LINE	POSITION TODAY	FACILITY
Black pepper, premium 580 g/l	80–100 t contracted for 2026; expandable against a firm 2027 order	Natar
Black pepper, standard 500 g/l	Available now — 200 t per year	Natar
Robusta coffee, green	300 t/month sustained, headroom to 720 t/month	Natar + 17 stations
Cocoa, bean and processed	Available; powder and nibs produced in-house	Natar

TAPAK — traceability that can be checked

Traceability and Accountability of Professional Agri-KGF. Our own platform, live and in production. It records farmer identity, plot polygon coordinates, purchase volume per transaction, digital receipts, and warehouse lot movement.

A buyer asking which farms a container came from receives a plot-level answer. We can grant dashboard access for independent verification rather than asking a buyer to take our word for it.

SUSTAINABILITY

aGROWforests — a consortium funded by GIZ, the German development agency — covers land restoration, deforestation prevention and certified supply chains. GIZ funds it and audits compliance. KGF is the lead local implementer.

Composting runs at our LKC and Taman Sari facilities plus two communal units in Ulu Belu. More than 10 tonnes of compost has been distributed to farmers to date.

COMPLIANCE — INCLUDING WHAT WE DO NOT HOLD

- Halal (BPJPH) — Not yet held. Will be obtained to buyer requirement.
- Organic — Not certified. Land in transition; we do not claim it.
- EUDR due diligence — In preparation with Verstegen and Fairfood.
- K3 and waste SOP — In place at Gudang Natar.
- BPJS and payroll — Paid and active.

PRODUCT	GRADE / FORM	SPECIFICATION	AVAILABILITY
Black pepper — Premium	Premium FAQ, export grade	Bulk density min. 580 g/l. Lampung Black Pepper is a protected origin name.	≈100 t/year, contracted to our European buyer. Expandable against a firm 2027 order.
Black pepper — Standard	Grinding and blending grade	Bulk density 500 g/l. Sound, clean pepper below European premium density.	Available now — 200 t/year. Does not compete with the premium line.
Robusta coffee	Green bean	Dry natural (asalan kering), and sorted to defect 80 / 120.	300 t/month sustained, headroom to 720 t/month. Sourced Tanggamus.
Cocoa bean	Fermented and non-fermented	Fermented carries a premium over non-fermented at the farm gate.	Available across the Lampung network.
Cocoa processed	Powder and nibs	Downstream processed in-house at Natar, not raw bean only.	Available.
Cocoa butter	Pressed	Specification confirmed against enquiry.	Sourced to order — not a stocked line.
Nutmeg	Whole dried	Specification confirmed against enquiry.	Sourced to order — not a stocked line.

Also sourced to order

Cloves (cengkeh), Java long pepper (cabe jawa) and cubeb (kemukus), all whole dried, from the same farmer network. Volume confirmed against enquiry.

Confirmed per order

Moisture and foreign matter, packaging and net weight, shelf life, MOQ, incoterms, port of loading and lead time are agreed against each enquiry. Pricing on application.

What we are asking of ATDAG Cairo

Introductions to Egyptian importers, grinders and distributors whose requirements match this portfolio. We would open any relationship with a trial container, so quality is judged on the product rather than on paper.
